Overview

Thank you for purchasing Ubiquiti TOUGHCable Ethernet Cabling and TOUGHCable Ethernet Connectors.

Ubiquiti offers two different types of industrial-grade TOUGHCable Ethernet Cabling in 1000ft (304.8m) lengths and 24 American Wire Gauge (AWG):

- **Level 1 Shielding Protection**  Category 5e Outdoor Carrier Class Shielded Cable
- **Level 2 Shielding Protection**  Category 5e Outdoor Carrier Class Shielded Cable that features an Anti-Crosstalk Divider and is designed to provide optimal performance on Gigabit Ethernet networks.

Ubiquiti TOUGHCable Ethernet Connectors are specifically designed for use with Ubiquiti TOUGHCable Ethernet Cabling and are offered in 100 pc. bags. TOUGHCable Ethernet Connectors:

- Eliminate Ethernet electrostatic discharge (ESD) attacks and Ethernet hardware damage
- Allow rapid field deployment without soldering

Installation Requirements

- **TOUGHCable Ethernet Cabling**
  - Level 1 Shielding Protection
  - Level 2 Shielding Protection
- **TOUGHCable Ethernet Connectors**
- Wire Strippers/Cutters
- Cable Crimpers
Wiring the Cable (Level 1 Shielding)

1. Use a TOUGH Cable Connector to gauge how much of the jacket to strip (roughly 22 mm), mark the appropriate length and strip the necessary length of cable jacket with wire strippers.

Note: Use caution when stripping the jacket from the cable to avoid severing the foil shield protecting the copper drain wire and twisted pair cable.
2. Carefully fold back the foil shield to expose the drain wire and twisted pair cable.

**Note:** Do not rip the foil shield completely away so that a portion of it can later be inserted into the TOUGHCable Connector to terminate the connection.

3. Carefully fold back the drain wire, numbered 0 in the Cable Wiring Specification (T568B).
4. Cut or tear away the clear plastic wrapping around the twisted pair cable and untwist the wires that are exposed.

5. Place the wires in order as shown below (and as detailed in the Cable Wiring Specification (T568B)), ensuring they are as straight and compact as possible.
6. Using wire cutters, trim the end of the wires evenly to ensure a straight surface to insert into the TOUGH Cable Connector.

7. Fold the foil shield back up towards the exposed wires; leaving roughly half the distance exposed while covering the bottom half with the foil. Fold back any excess foil.

Note: Keep the excess foil folded back so the inside is facing out. Ensure the drain wire remains folded back, as this will loop through the drain wire hook on the outside of the connector.
8. Keeping the wires in the correct order, mold the foil firmly around the covered portion of wires and insert the wires carefully into the *TOUGH*Cable Connector.

![Image of a molded foil and inserted wires into a TOUGH* Cable Connector](image)

**Note:** Make sure the wires are inserted according to the Cable Wiring Specification (T568B) and that the folded back portion of the foil shield makes connection with the metal inside of the *TOUGH*Cable Connector. Ensure that the wires are inserted into the *TOUGH*Cable Connector completely and that they make contact with the tip of the connector. Also, for extra protection and support of the twisted wire cabling inside, ensure that the outer cable jacket fits inside the *TOUGH*Cable Connector prior to crimping in step 9.

![Image of a crimped TOUGH* Cable Connector](image)
9. Place the TOUGH Cable Connector and twisted pair cable into the cable crimper and press firmly.

![Cable Crimper]

Note: Make sure the drain wire remains outside of the connector.

10. Loop the exposed portion of drain wire through the drain wire hook on the outside of the connector and fold it over for a secure hold.

![Looped Drain Wire]

11. Repeat steps 1-10 for the other end of the Level 1 Shielding TOUGH Cable Ethernet Cable.

Congratulations! The Level 1 Shielding TOUGH Cable Ethernet Cable is ready for use.
Wiring the Cable (Level 2 Shielding)

1. Use a TOUGHCable Connector to gauge how much of the jacket to strip (roughly 22 mm), mark the appropriate length and strip the necessary length of cable jacket with wire strippers.

2. Carefully remove the twisted wire shielding covering the drain wire and foil shield.
3. Carefully fold back the drain wire numbered 0 in the Cable Wiring Specification (T568B).

4. Carefully fold back the foil shield to expose the clear plastic wrapping around the twisted pair cable.

Note: Do not rip the foil shield completely away so that a portion of it can later be inserted into the TOUGH Cable Connector to terminate the connection.
5. Cut or tear away the clear plastic wrapping around the twisted pair cable and untwist the wires to expose the plastic *Anti-Crosstalk Divider*.

6. Using wire cutters, cut away the exposed portion of the plastic *Anti-Crosstalk Divider*. 
7. Place the wires in order as shown in the Cable Wiring Specification (T568B), ensuring they are as straight and compact as possible.

8. Fold the foil shield back up towards the exposed wires; leaving roughly half the distance exposed while covering the bottom half with the foil. Fold under or tear away any excess foil. Using wire cutters, trim the end of the wires evenly to ensure a straight surface to insert into the TOUGHCable Connector.
9. Keeping the wires in the correct order, insert the wires carefully into the *TOUGHCable Connector*.

![Image of TOUGHCable Connector](image)

**Note:** Make sure the wires are inserted according to the Cable Wiring Specification (T568B) and that the outside of the foil shield makes connection with the metal inside of the *TOUGHCable Connector*. Ensure that the wires are inserted into the *TOUGHCable Connector* completely and that they make contact with the tip of the connector. Also, for extra protection and support of the twisted wire cabling inside, ensure that the outer cable jacket fits inside the *TOUGHCable Connector* prior to crimping in step 10.
10. Place the TOUGH Cable Connector and twisted pair cable into the cable crimper and press firmly.

![Image of TOUGH Cable Connector and twisted pair cable into the cable crimper](image)

*Note:* Make sure the drain wire remains outside of the connector.

11. Loop the exposed portion of drain wire through the drain wire hook on the outside of the connector and fold it over for a secure hold.

![Image of looped drain wire through drain wire hook](image)

12. Repeat steps 1-11 for the other end of the Level 2 Shielding TOUGH Cable Ethernet Cable.

Congratulations! The Level 2 Shielding TOUGH Cable Ethernet Cable is ready for use.

General Warranty

UBIQUITI NETWORKS, Inc (“UBIQUITI NETWORKS”) represents and warrants that the Products furnished hereunder shall be free from defects in material and workmanship for a period of one (1) year from the date of shipment by UBIQUITI NETWORKS under normal use and operation. UBIQUITI NETWORKS sole and exclusive obligation under the foregoing warranty shall be to repair or replace, at its option, any defective Product that fails during the warranty period. The expense of removal and reinstallation of any item is not included in this warranty.

The foregoing warranty is exclusive and in lieu of all other warranties, express or implied, including the implied warranties of merchantability and fitness for a particular purpose and any warranties arising from a course of dealing, usage or trade practice with respect to the products. Repair or replacement in the manner provided herein shall be the sole and exclusive remedy of Buyer for breach of warranty and shall constitute fulfillment of all liabilities of UBIQUITI NETWORKS with respect to the quality and performance of the Products. UBIQUITI NETWORKS reserves the right to inspect all defective Products (which must be returned by Buyer to UBIQUITI NETWORKS factory freight prepaid).

No Products will be accepted for replacement or repair without obtaining a Return Materials Authorization (RMA) number from UBIQUITI NETWORKS. Products returned without an RMA number will not be processed and will be returned to Buyer freight collect. UBIQUITI NETWORKS shall have no obligation to make repairs or replacement necessitated by catastrophe, fault, negligence, misuse, abuse, or accident by Buyer, Buyer’s customers or any other parties. The warranty period of any repaired or replaced Product shall not extend beyond its original term.
Warranty Conditions

The foregoing warranty shall apply only if:

(I) The Product has not been subjected to misuse, neglect or unusual physical, electrical or electromagnetic stress, or some other type of accident.

(II) No modification, alteration or addition has been made to the Product by persons other than UBIQUITI NETWORKS or UBIQUITI NETWORKS’ authorized representatives or otherwise approved by UBIQUITI NETWORKS.

(III) The Product has been properly installed and used at all times in accordance, and in all material respects, with the applicable Product documentation.

Disclaimer: UBIQUITI NETWORKS does not warrant that the operation of the products is error-free or that operation will be uninterrupted. In no event shall UBIQUITI NETWORKS be responsible for damages or claims of any nature or description relating to system performance, including coverage, buyer’s selection of products for buyer’s application and/or failure of products to meet government or regulatory requirements.

Returns

In the unlikely event a defect occurs, please work through the dealer or distributor from which this product was purchased.
Declaration of Conformity
