Introduction

Thank you for purchasing the Ubiquiti Networks™ Rocket™ M5 GPS, model RM5-GPS. This Quick Start Guide is designed to walk you through installation and show you how to access the airOS™ Configuration Interface.

Quick Start Guide

Installation Requirements

- The GPS Patch Antenna needs to have clear line of sight to the sky.
- Shielded Category 5 (or above) cabling should be used for all wired Ethernet connections and should be grounded through the AC ground of the PoE.

We recommend that you protect your networks from the most brutal environments and devastating ESD attacks with industrial-grade shielded Ethernet cable from Ubiquiti Networks™. For more details, visit [www.ubnt.com/toughcable](http://www.ubnt.com/toughcable)
Hardware Overview

- Connects to GPS Patch Antenna
- Connects to Sector Antenna
- Removable Cover
- Secondary Ethernet Port
- Primary Ethernet Port

Note: The Secondary Ethernet Port is capable of 24V Power over Ethernet output, which can provide power to a secondary device. It can be enabled using the airOS interface.
LEDs

**Power** The Power LED will light steady green when the RocketM5 GPS is connected to a power source.

**Primary Ethernet** The first Ethernet LED will light steady green when an active Ethernet connection is made to the Primary Ethernet Port and flash when there is activity.

**Secondary Ethernet** The second Ethernet LED will light steady green when an active Ethernet connection is made to the Secondary Ethernet Port.

**GPS** The GPS LED lights up green when the GPS signal strength can sustain airSync operation. This requires a minimum of 3 satellite connections.

**Signal** The first Signal LED is lit when the wireless signal strength is above -94 dBm, the second LED when the wireless signal strength is above -65 dBm.

*Note:* By default, the Signal LEDs represent the wireless signal strength with default threshold values. In the airOS interface, you can modify the threshold values for each LED or configure the LEDs to display the GPS connection quality instead. The settings can be configured on the Advanced tab under Signal LED Thresholds.
Adapter

The RocketM5 GPS includes a pre-installed adapter for use on dish antenna installations. The adapter can remain on when connecting the RocketM5 GPS to a sector antenna. Removal for sector antenna installations is optional. To remove the pre-installed adapter from the RocketM5 GPS, lift up the latch and slide the adapter off.

Hardware Installation

1. Remove the Port Cover by lifting the release latch on the bottom of the RocketM5 GPS and sliding the Port Cover off.
2. Connect an Ethernet cable to the *Primary Ethernet Port*.

3. If you need to connect the *Secondary Ethernet Port*, then do so at this time. Replace the *Port Cover*.

4. Attach the *RF Cables* to the connectors labeled **Chain 0** and **Chain 1** on the RocketM5 GPS.
5. With the pre-installed adapter connected, attach the RocketM5 GPS to an antenna. Align the mounting tabs on the back of the RocketM5 GPS with the mounting bracket on the antenna. Slide the RocketM5 GPS down until it locks into place.

6. Attach the RF Cables from the RocketM5 GPS to the connectors on the antenna.
7. Connect the GPS Patch Antenna to the center connector labeled GPS on the RocketM5 GPS.

8. Attach the Protective Shroud.

Align the arrow on the top of the shroud with the short hash mark on the Dish Antenna, and then rotate the shroud clockwise until it aligns with the long hash mark to lock it into place. Slide the Protective Shroud down over the RocketM until it locks into place on the Sector Antenna.
9. Place the GPS Patch Antenna on the mounting hardware.

**Placement on a Dish Antenna**  
**Placement on a Sector Antenna**

### Connecting Power over Ethernet

1. Connect the other end of the Ethernet cable from the RocketM to the Ethernet port labeled **POE** on the **PoE Adapter**.

2. Connect an Ethernet cable from your LAN to the Ethernet port labeled **LAN** on the **PoE Adapter**.
3. Connect the Power Cord to the power port on the PoE Adapter. Connect the other end of the Power Cord to a power outlet.

Accessing airOS

Verify connectivity in the airOS interface.

1. Make sure that your host machine is connected via Ethernet to the RocketM5 GPS.
2. Configure the Ethernet adapter on your host system with a static IP address on the 192.168.1.x subnet.
3. Launch your web browser and type http://192.168.1.20 in the address field. Press enter (PC) or return (Mac).

4. The login screen will appear. Enter ubnt in the Username and Password fields. Select your Country and Language. You must agree to the Terms of Use to use the product. Click Login.

Note: U.S. product versions are locked to the U.S. Country Code to ensure compliance with FCC regulations.
5. The airOS Configuration Interface will appear, allowing you to customize your settings as needed. On the Main tab, you can verify the **GPS Signal Quality**. Click the **GPS Details** tab under Monitor to view the Satellite and Signal details.

**GPS Details tab**

**Installer Compliance Responsibility**

Devices must be professionally installed and it is the professional installer's responsibility to make sure the device is operated within local country regulatory requirements.

Since Ubiquiti Networks equipment can be paired with a variety of antennas and cables, the **Antenna Gain**, **Cable Loss**, and **Output Power** fields are provided to the professional installer to assist in meeting regulatory requirements.
airSync Capabilities

Many situations require the use of multiple airMAX M series devices on the same tower. For example, add an airMAX basestation on an existing tower to service a new area, or increase the capacity of an existing network by using multiple basestations with narrow coverage areas instead of one basestation with a wide coverage area.

If the devices are using the same RF band (e.g. 5 GHz or 2.4 GHz), even if they are configured on separate frequencies, the devices would interfere with each other. Additionally some RF bands like 900 MHz and 3.65 GHz have only 1 20 MHz channel requiring all the basestations to use the same frequency. This interference will cause Receive (RX) errors on the basestation when it receives packets from associated stations that are typically miles away.

With airSync, the basestations make use of a common clock source using the built-in GPS receiver. One device is configured as the synchronization master and the others are configured in Slave Mode and provided with the MAC address of the Master.

Once this is done, the Master and Slave devices synchronize their transmit and receive cycles so that they transmit at the same time and receive at the same time. This resolves the interference issues.

Enabling Master/Slave Mode

1. Launch your web browser and log in to the airOS interface (see page 9 for login details).
2. Go to the Ubiquiti tab.

![airOS interface screenshot]
3. Select the appropriate mode: **Master Mode** should be selected on your master device and **Slave Mode** should be selected on all of your slave devices with the MAC address of the **Master** in the **Sync Master** field.

4. Click **Change** to save your selection.

* Only 5725 - 5850 MHz supported in the USA (US units with FCC ID: SWX-RM5 are allowed 5250 - 5850 MHz.)
Safety Notices

1. Read, follow, and keep these instructions.
2. Heed all warnings.
3. Only use attachments/accessories specified by the manufacturer.

**WARNING:** Do not use this product in location that can be submerged by water.

**WARNING:** Avoid using this product during an electrical storm. There may be a remote risk of electric shock from lightning.

Electrical Safety Information

1. Compliance is required with respect to voltage, frequency, and current requirements indicated on the manufacturer’s label. Connection to a different power source than those specified may result in improper operation, damage to the equipment or pose a fire hazard if the limitations are not followed.

2. There are no operator serviceable parts inside this equipment. Service should be provided only by a qualified service technician.

3. This equipment is provided with a detachable power cord which has an integral safety ground wire intended for connection to a grounded safety outlet.
   a. Do not substitute the power cord with one that is not the provided approved type. Never use an adapter plug to connect to a 2-wire outlet as this will defeat the continuity of the grounding wire.
   b. The equipment requires the use of the ground wire as a part of the safety certification, modification or misuse can provide a shock hazard that can result in serious injury or death.
   c. Contact a qualified electrician or the manufacturer if there are questions about the installation prior to connecting the equipment.
   d. Protective earthing is provided by Listed AC adapter. Building installation shall provide appropriate short-circuit backup protection.
   e. Protective bonding must be installed in accordance with local national wiring rules and regulations.

General Warranty

UBIQUITI NETWORKS, Inc (“UBIQUITI NETWORKS”) represents and warrants that the Products furnished hereunder shall be free from defects in material and workmanship for a period of one (1) year from the date of shipment by UBIQUITI NETWORKS under normal use and operation. UBIQUITI NETWORKS sole and exclusive obligation under the foregoing warranty shall be to repair or replace, at its option, any defective Product that fails during the warranty period. The expense of removal and reinstallation of any item is not included in this warranty.
The foregoing warranty is exclusive and in lieu of all other warranties, express or implied, including the implied warranties of merchantability and fitness for a particular purpose and any warranties arising from a course of dealing, usage or trade practice with respect to the products. Repair or replacement in the manner provided herein shall be the sole and exclusive remedy of Buyer for breach of warranty and shall constitute fulfillment of all liabilities of UBIQUITI NETWORKS with respect to the quality and performance of the Products. UBIQUITI NETWORKS reserves the right to inspect all defective Products (which must be returned by Buyer to UBIQUITI NETWORKS factory freight prepaid).

No Products will be accepted for replacement or repair without obtaining a Return Materials Authorization (RMA) number from UBIQUITI NETWORKS. Products returned without an RMA number will not be processed and will be returned to Buyer freight collect. UBIQUITI NETWORKS shall have no obligation to make repairs or replacement necessitated by catastrophe, fault, negligence, misuse, abuse, or accident by Buyer, Buyer’s customers or any other parties. The warranty period of any repaired or replaced Product shall not extend beyond its original term.

EXCEPT FOR ANY EXPRESS WARRANTIES PROVIDED HEREIN, UBIQUITI NETWORKS’ PRODUCTS AND SERVICES ARE PROVIDED "AS IS", WITHOUT WARRANTY OR CONDITION OF ANY KIND, EITHER EXPRESS OR IMPLIED. UBIQUITI NETWORKS, ITS AFFILIATES, AND ITS AND THEIR THIRD PARTY DATA, SERVICE, SOFTWARE AND HARDWARE PROVIDERS HEREBY DISCLAIM AND MAKE NO OTHER REPRESENTATION OR WARRANTY OF ANY KIND, EXPRESS, IMPLIED OR STATUTORY, INCLUDING BUT NOT LIMITED TO REPRESENTATIONS, GUARANTEES, OR WARRANTIES OF MERCHANTABILITY, ACCURACY, QUALITY OF SERVICE OR RESULTS, AVAILABILITY, SATISFACTORY QUALITY, LACK OF VIRUSES, TITLE, QUIET ENJOYMENT, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT. BUYER ACKNOWLEDGE THAT NEITHER UBIQUITI NETWORKS NOR ITS THIRD PARTY PROVIDERS CONTROLS BUYER’S EQUIPMENT OR THE TRANSFER OF DATA OVER COMMUNICATIONS FACILITIES, INCLUDING THE INTERNET, AND THAT THE PRODUCTS AND SERVICES MAY BE SUBJECT TO LIMITATIONS, INTERRUPTIONS, DELAYS, CANCELLATIONS AND OTHER PROBLEMS INHERENT IN THE USE OF THE COMMUNICATIONS FACILITIES. UBIQUITI NETWORKS, ITS AFFILIATES AND ITS AND THEIR THIRD PARTY PROVIDERS ARE NOT RESPONSIBLE FOR ANY INTERRUPTIONS, DELAYS, CANCELLATIONS, DELIVERY FAILURES, DATA LOSS, CONTENT CORRUPTION, PACKET LOSS, OR OTHER DAMAGE RESULTING FROM THESE PROBLEMS.

Warranty Conditions

The foregoing warranty shall apply only if:

(I) The Product has not been subjected to misuse, neglect or unusual physical, electrical or electromagnetic stress, or some other type of accident.

(II) No modification, alteration or addition has been made to the Product by persons other than UBIQUITI NETWORKS or UBIQUITI NETWORK’S authorized representatives or otherwise approved by UBIQUITI NETWORKS.
(III) The Product has been properly installed and used at all times in accordance, and in all material respects, with the applicable Product documentation.

(IV) All Ethernet cabling runs use CAT5 (or above) shielded cabling.

Disclaimer: UBIQUITI NETWORKS does not warrant that the operation of the products is error-free or that operation will be uninterrupted. In no event shall UBIQUITI NETWORKS be responsible for damages or claims of any nature or description relating to system performance, including coverage, buyer’s selection of products for buyer’s application and/or failure of products to meet government or regulatory requirements.

Returns

In the unlikely event a defect occurs, please work through the dealer or distributor from which this product was purchased.

Compliance

FCC

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operations of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

For MPE and antenna usage details, please visit our website at www.ubnt.com/products

Industry Canada

This Class A digital apparatus complies with Canadian ICES-003.

To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that permitted for successful communication.
This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

1. This device may not cause interference, and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Users should also be advised that high-power radars are allocated as primary users (i.e. priority users) of the bands 5250-5350 MHz and 5650-5850 MHz and that these radars could cause interference and/or damage to LE-LAN devices.

This radio transmitter (IC: 6545A-RM5) has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain and required antenna impedance for each antenna type indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

- 7 dBi omni (50 ohm)
- 20 dBi sector (50 ohm)
- 24 dBi panel (50 ohm)
- 30 dBi grid (50 ohm)
- 30 dBi dish (50 ohm)

Cet appareil numérique de la classe A est conforme à la norme NMB-003 Canada.

Pour réduire le risque d’interférence aux autres utilisateurs, le type d’antenne et son gain doivent être choisies de façon que la puissance isotrope rayonnée équivalente (PIRE) ne dépasse pas ce qui est nécessaire pour une communication réussie.

Cet appareil est conforme à la norme RSS Industrie Canada exempts de licence norme(s). Son fonctionnement est soumis aux deux conditions suivantes:

1. Cet appareil ne peut pas provoquer d’interférences et
2. Cet appareil doit accepter toute interférence, y compris les interférences qui peuvent causer un mauvais fonctionnement du dispositif.

Les utilisateurs devraient également noter que radars haute puissants sont alloués comme principaux utilisateurs (c’est-à-dire les utilisateurs de priorité) des bandes 5250-5350 MHz et 5650 à 5850 MHz et que ces radars pourraient causer des interférences ou dommages aux dispositifs LAN.

Cet émetteur radio (IC: 6545A-RM5) a été approuvée par Industrie Canada pour l'exploitation avec l'antenne types énumérés ci-dessous avec le gain maximal admissible et requis l'impédance de l'antenne pour chaque type d'antenne indiqué. Types d'antenne non inclus dans cette liste, ayant un gain supérieur au gain maximal indiqué pour ce type, sont strictement interdits pour une utilisation avec cet appareil. Immédiatement suite à la remarque, le fabricant doit fournir une liste de tous les types d'antenne approuvés pour une utilisation avec l'émetteur, ce qui indique le gain maximal d'antenne permis (en dBi) et requis d'impédance pour chacun.

- 7 dBi omnidirectionnelle (50 ohm)
- 20 dBi secteur (50 ohm)
- 24 dBi panneau (50 ohm)
- 30 dBi grille (50 ohm)
- 30 dBi parabolique (50 ohm)
RF Exposure Warning

The antennas used for this transmitter must be installed to provide a separation distance of at least 37.2 cm from all persons and must not be located or operating in conjunction with any other antenna or transmitter.

Les antennes utilisées pour ce transmetteur doivent être installé en considérant une distance de séparation de toute personnes d’au moins 37.2 cm et ne doivent pas être localisé ou utilisé en conflit avec tout autre antenne ou transmetteur.

CE Marking

CE marking on this product represents the product is in compliance with all directives that are applicable to it.

Alert Sign (!) Follows CE Marking

Alert sign must be indicated if a restriction on use applied to the product and it must follow the CE marking.

RoHS/WEEE Compliance Statement

English

European Directive 2002/96/EC requires that the equipment bearing this symbol on the product and/or its packaging must not be disposed of with unsorted municipal waste. The symbol indicates that this product should be disposed of separately from regular household waste streams. It is your responsibility to dispose of this and other electric and electronic equipment via designated collection facilities appointed by the government or local authorities. Correct disposal and recycling will help prevent potential negative consequences to the environment and human health. For more detailed information about the disposal of your old equipment, please contact your local authorities, waste disposal service, or the shop where you purchased the product.

Español
La Directiva 2002/96/CE de la UE exige que los equipos que lleven este símbolo en el propio aparato y/o en su embalaje no deben eliminarse junto con otros residuos urbanos no seleccionados. El símbolo indica que el producto en cuestión debe separarse de los residuos domésticos convencionales con vistas a su eliminación. Es responsabilidad suya desechar este y cualesquiera otros aparatos eléctricos y electrónicos a través de los puntos de recogida que ponen a su disposición el gobierno y las autoridades locales. Al desechar y reciclar correctamente estos aparatos estará contribuyendo a evitar posibles consecuencias negativas para el medio ambiente y la salud de las personas. Si desea obtener información más detallada sobre la eliminación segura de su aparato usado, consulte a las autoridades locales, al servicio de recogida y eliminación de residuos de su zona o pregunte en la tienda donde adquirió el producto.

Français
La directive européenne 2002/96/CE exige que l’équipement sur lequel est apposé ce symbole sur le produit et/ou son emballage ne soit pas jeté avec les autres ordures ménagères. Ce symbole indique que le produit doit être éliminé dans un circuit distinct de celui pour les déchets des ménages. Il est de votre responsabilité de jeter ce matériel ainsi que tout autre matériel électrique ou électronique par les moyens de collecte indiqués par le gouvernement et les pouvoirs publics des collectivités territoriales. L’élimination et le recyclage en bonne et due forme ont pour but de lutter contre l’impact négatif potentiel de ce type de produits sur l’environnement et la santé publique. Pour plus d’informations sur le mode d’élimination de votre ancien équipement, veuillez prendre contact avec les pouvoirs publics locaux, le service de traitement des déchets, ou l’endroit où vous avez acheté le produit.
Italia

La direttiva europea 2002/96/EC richiede che le apparecchiature contrassegnate con questo simbolo sul prodotto e/o sull’imballaggio non siano smaltite insieme ai rifiuti urbani non differenziati. Il simbolo indica che questo prodotto non deve essere smaltito insieme ai normali rifiuti domestici. È responsabilità del proprietario smaltire sia questi prodotti sia le altre apparecchiature elettriche ed elettroniche mediante le specifiche strutture di raccolta indicate dal governo o dagli enti pubblici locali. Il corretto smaltimento ed il riciclaggio aiuteranno a prevenire conseguenze potenzialmente negative per l’ambiente e per la salute dell’essere umano. Per ricevere informazioni più dettagliate circa lo smaltimento delle vecchie apparecchiature in Vostro possesso, Vi invitiamo a contattare gli enti pubblici di competenza, il servizio di smaltimento rifiuti o il negozio nel quale avete acquistato il prodotto.

Declaration of Conformity

Česky [Czech]
UBIQUITI NETWORKS tímto prohlašuji, že tento UBIQUITI NETWORKS device, je ve shodě s základními požadavky a dalšími příslušnými ustanoveními směrnice 1999/5/ES.
